Web App - Features to Test by Role

SUPER_ADMIN / ADMIN - /admin/*

- Dashboard: live visitor count, arrivals today, pending approvals, active visitors table
- Analytics: revenue trends, occupancy rates, maintenance overview, visitor analytics
- Locations: CRUD offices, assign kiosks per location, view per-location stats
- Tenants: multi-tenant list, create/edit/delete tenants, tenant tiers, status filter
- Leases: unit number, monthly rent, status (ACTIVE/EXPIRING/EXPIRED), date ranges
- Assets: card grid, status/maintenance indicators, QR code generation, check out, detail view
- Maintenance: request cards with priority badge, assign vendor, start/complete work orders
- Cameras: add CCTV cameras with RTSP URL, status toggle
- CCTV: live frame polling, detection feed (license plates, face recognition)
- Notifications: create/edit email templates with {{variable}} support, notification logs
- Invites: pre-register visitors, bulk CSV upload, cancel invites
- Watchlist: add/remove flagged visitors with EXACT/CONTAINS matching
- Profile: edit personal info, notification preferences, change password

HOST - /host

- Dashboard: pending/active visitor count cards
- Invite Guest: form with name, email, company, arrival date/time, duration
- Recent Activity: visitor list with Approve/Decline buttons on pending items
- Profile: edit personal info and preferences

RECEPTIONIST - /receptionist

- Check-In tab: QR code scanner or manual registration form with host/location selectors
- Check-Out tab: search visitors and finalize checkout
- Search tab: lookup visitors by name/email/phone

Public (unauthenticated) - /, /checkin, /checkout

- Home page: Check In and Check Out CTA cards, Staff Login link
- Self Check-In: scan invite QR, returning visitor search, manual form with NDA signature
- Self Check-Out: list checked-in visitors and finalize
- Download this Demo Guide PDF from the login page

Mobile Apps - Features to Test

Admin Mobile (aladmin / admin)

- Dashboard: live stats, approvals needed, recent insights
- Visitors: 3 sub-tabs ACTIVE / PENDING (approve/reject) / HISTORY
- Parcels: log new delivery (select recipient, courier, tracking), notify recipient
- Maintenance: list requests, assign/start/complete, new request form with priority/location
- Assets: grid view, status indicators, check out, generate QR code, new asset form
- Profile: user info, logout

Host Mobile (alhost)

- Arrivals: pending visitors for this host, approve/reject with confirmation
- Pre-Register: invite a guest with name, email, arrival date/time, QR invite
- My Parcels: view parcels (courier, status), collect with signature pad
- Profile: user info, logout

Kiosk Mobile (alreception / receptionist role)

- Welcome screen: menu of self-service options
- Touchless Check-In: scan invite QR code via camera
- New Visitor: manual registration with selfie, host selector, NDA signature
- Returning Visitor: search by email/phone, pre-fill form
- Check-Out: list checked-in visitors, confirm checkout
- Waiting Room: auto-refresh pending check-in status (10s polling)
- Settings: 4-digit PIN lock, change PIN, logout

15-Minute Demo Script

1. Admin Web Dashboard

Log in as admin / admin123. See live stats, active visitors table.
Go to /admin/locations - view offices. Go to /admin/tenants - see 3 tenants.
Go to /admin/analytics - check revenue trends. Go to /admin/leases.

2. Asset & Maintenance Flow

Go to /admin/assets - view cards, tap QR code, check out an asset.
Go to /admin/maintenance - see requests with priority badges. Create a new request.

3. Host Web Experience

Log out. Log in as alhost / changeme123!. Go to /host.
Invite a guest. See recent activity. Approve or decline a pending visitor.

4. Receptionist Flow

Log in as alreception / changeme123!. Go to /receptionist.
Use Check-In tab to manually register a walk-in visitor.

5. Kiosk Self Check-In (Web)

Open https://pm.213-199-50-129.sslip.io in an incognito window.
Click Check In. Use the manual form to register as a walk-in visitor.

6. Mobile Admin App

Open Expo Go. Enter exp://pmadmin.213-199-50-129.sslip.io:8084.
Log in as admin / admin123. Browse Dashboard, Visitors, Parcels, Maintenance, Assets.

7. Mobile Host App

Open Expo Go. Enter exp://pmhost.213-199-50-129.sslip.io:8085.
Log in as alhost / changeme123!. Approve an arrival. Pre-register a guest.

8. Mobile Kiosk App

Open Expo Go. Enter exp://pmkiosk.213-199-50-129.sslip.io:8086.
Log in as alreception / changeme123!. Complete a New Visitor check-in with NDA signature.
Then set a 4-digit PIN for session lock.

9. Returning Visitor

In the Kiosk app, tap Returning Visitor and search by email/phone.
Select a past visitor to pre-fill the check-in form.

10. Cross-App Parcel Flow

In Host Mobile, check My Parcels for collected/uncollected parcels.
In Admin Mobile, log a new parcel delivery. In Web /admin/invites, do a bulk CSV upload.

Seeded Data Overview

The database includes realistic demo data across 3 tenants.

Model	Count
Tenants	3
Users	13
Locations	8
Hosts	12
Visitors	300+
Pre-Registrations	100+
Parcels	30
Assets	30+
Maintenance Requests	50+
Leases	10+
Watchlist Entries	4

All visitors have realistic names, emails, phone numbers, check-in/out times, and statuses. Pre-registrations are scheduled for future dates. Parcels have courier info and collection status. Assets have maintenance schedules and QR codes.

Technical Notes

- Caddy reverse proxy serves all apps on 443 at *.213-199-50-129.sslip.io.
- Expo Go connects via exp:// protocol on ports 8084-8086.
- Backend API: https://pmapi.213-199-50-129.sslip.io/api/
- JWT tokens expire after 1 hour. Refresh via login.
- Kiosk supports 4-digit PIN lock after initial login.
- NDA signing uses an on-screen signature pad.
- Default password env var: SEED_USER_PASSWORD (fallback: changeme123!)
- Seed data is generated by python manage.py seed_centralized
